

Advance Trauma Care for Nurses

ATCN Provider Course

- **Course Description:**

This two and a half days highly interactive course is conducted concurrently and partially merged with the Advanced Trauma Life Support Course (ATLS). Participants attend the ATLS lectures presented by ATLS instructors, and then proceed to 'hands-on' scenario-based skill stations. Candidates apply the principles of ATCN in the scenario-based skill stations. Course material includes text books and a pretest questions for self-assessment.

- **Course Objective:**

Participants will have the knowledge and skills required for rapidly identifying, managing, and treating adult and pediatric multi-system trauma patients. Moulaged patient models are used to simulate the various trauma situations and guide the participant.

- **Target audience and requirements:**

This course is designed for nurses only, target participants are Emergency and Critical Care nurses. Interested candidates must be registered nurses with valid nursing licenses.

- **Accreditation and awards:**

A successful candidate will receive a provider card and a certificate that remain valid for four years. Candidate will also receive 19 CE hours by the STN Society. This course is co-sponsored and follows the guidelines and standards set by the Society of Trauma Nurses (STN) and the American College of Surgeons Committee on Trauma in USA. Course material is renewed every 4 years.
